WORK EXPERIENCE

Payton Planar Magnetics (www.paytongroup.com)

Global Leader for Planar Transformers

Company Representative in China

2016–2020

This multifaceted role required involvement in many fields in the electronic industry, including:

Subcontractors in China and Philippines – Oversaw quality of production and products. Ensured subcontractors met required industry and company standards. Sample tested critical products electrically, mechanically, and visually. Responsible for technical contact, investigations, and solutions for urgent matters as well as product preparations ahead of external audits.

Material Suppliers – Worked with many suppliers for metals, plastics, automation, and electronics, developing and maintaining relationships. Verified suppliers' quality level as well as originality of raw materials. Responsible for solutions to delivery times, quality, and prices issues.

Customers – Worked with many high-level customers globally, mainly focused on the automotive industry. Served as preliminary responder for special requests or quality issues, and, when urgent, flew directly to customers' factories for rapid and successful problem-solving.
